

Available with 10° downwards tilt

Easily integrate your PC devices

PRODUCT DETAILS

JUPITER SFF

Overview

Our JUPITER SFF screen mounts feature an integrated enclosure able to house small PCs and wireless connectivity devices, transforming older screens into simple and cost-effective digital signage solutions that are able to perform a plethora of tasks outside of the range of normal screens.

Two mounting arms are fixed to the back of the screen and slotted into the main mounting bracket, which fastens to the wall.

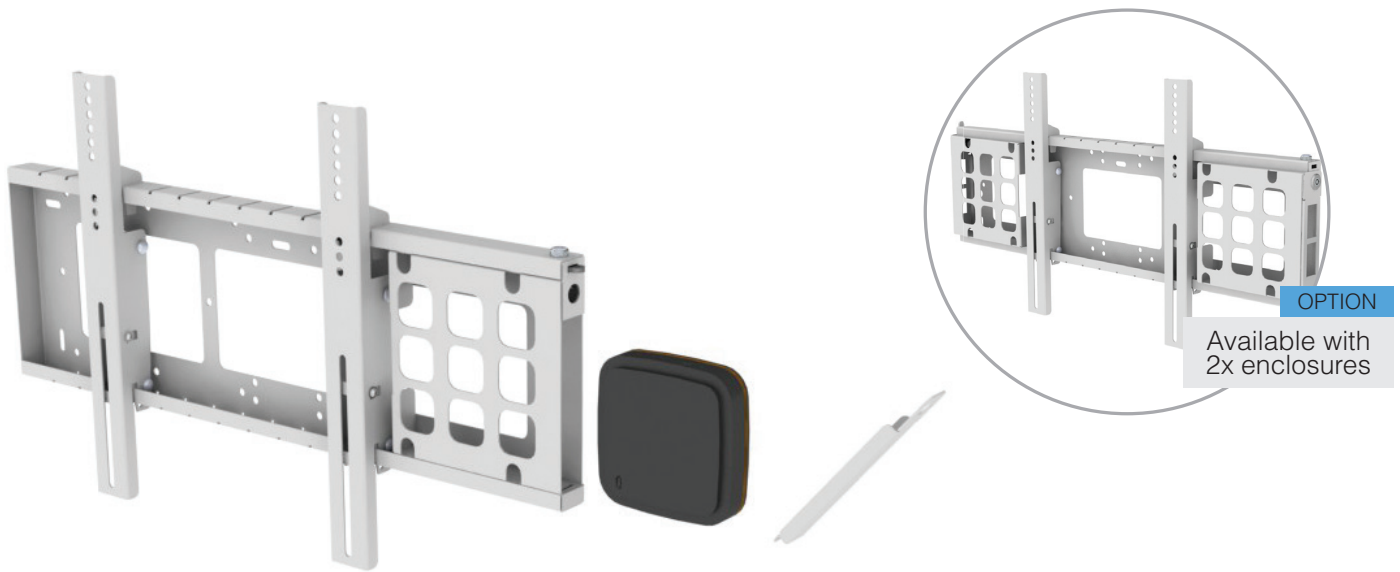

The arms are fixed into position with a strong locking bar and the device is secured with a padlock to prevent any access to the wall and screen fixings.

Features

- Integrated enclosure for small PC devices (2 sizes).
- Choice of left hand, right hand or 2x enclosures.
- Accommodates up to 500x600 VESA / 100kg screens.
- Available with 10° downwards tilt (POA).
- Adjustable arms accommodate the majority of mounting hole positions.
- Robust steel construction and drill resistant push button locks.

Benefits

- Able to house small PCs and wireless connectivity devices, transforming older screens into simple and cost-effective digital signage solutions.
- Complete cable management - No trailing cables, everything is housed neatly behind the screen.
- Ventilation slots to prevent overheating.

Models

Enclosure information	Code	VESA (up to)	MAX screen weight	Wall mounting centres
JUPITER 02				
● Size 2 (1x LR or RH enclosure)	J02-SF02-X	500x500	100kg	750mm(W) x 210mm(H)
